

Our Business Philosophy and Service Offering

Hoddinott Consulting is a *Wealth Creation* business providing specific services in the areas of:

- Accounting, Taxation and Business Advice &
- Financial Planning and Strategic Decision Making

Our business has been in operation since 1985 and seeks to provide the highest quality of advice within a boutique business environment wherein personal service is paramount in all that we do. We offer our services to business and individuals alike and happily have clients along all parts of the social and financial spectrum. Mums & Dads as well as large international organisations are all a part of our client family. The key client selection criterion for our firm is that "*we must like you and you like us*". Business is challenging enough without having to deal with grumpy, negative people who have little respect or regard for a relationship with a financial professional.

So if you're a nice person, genuinely wanting help from a group of talented professionals who have been in business for over 25 years then you may just have found in Hoddinott Consulting the perfect 'match'. But please don't take my word for it though, come and sample who we are for free – it just might be the most important financial decision you will ever make.

Our overriding philosophy is that *wealth creation is about achieving things that you value* and all that you do must lead now and continuously to achieving personal living values. Whatever you value most in life (and by the way it usually isn't money despite its usefulness), you must strive to achieve, otherwise you run the risk of being (at best) the richest person in the cemetery.

Our advice is designed to save you time, give you more opportunity to do the things you really want to do and to bring the future plans to the present as far as that is possible. We can of course greatly assist in making you money, but without the achievement of living values then that money is simply expensive paper.

Come and chat and you will see what we mean.....
